**DEADLINE
TO REGISTER
IS SEPTEMBER
19TH**

This course provides an integrative experience that allows students to see interconnections of environmental and social issues between North and South America (United States and Peru). Students will be introduced to topics such as ecotourism, environmental and economic sustainability, environmental justice, biodiversity, forest fragmentation, endangered species, and Latin American culture in an international setting.

Offered by the Department of Geography and the Cooperative Wetlands Center in cooperation with the Amazon Center for Environmental Education and Research (ACEER) Foundation.
